Wood Technology
Bachelor of Engineering (B.Eng.)

Rosenheim
Technical University
of Applied Sciences

BACHELOR'S DEGREE PROGRAMME

International Bachelor of Wood Technology

- Qualification: Bachelor of Engineering (B.Eng.)
- Duration: 8 semesters (7 theoretical and 1 practical)
- Credit Points (CP): 240
- Teaching language: English & German
- **Special feature:** Start your studies in English, acquire German language skills and finish in German

Course profile

There are many compelling reasons for studying wood technology in Rosenheim! Wood is an excellent material for developing modern and innovative products. And, as wood is a natural, renewable and sustainable material, its utilisation contributes to the reduction of CO₂ emissions.

For nearly 100 years, Rosenheim's renowned wood technology programme has been preparing graduates with the skills and knowledge necessary for a range of career opportunities worldwide. Our novel, innovative programme **International Bachelor of Wood Technology (IWT)** offers a solid engineering degree in wood technology, with studies both in German and in English. You will learn from top professors in wood technology and work in the state-of-the-art laboratories at Rosenheim. Our close links to industry will help you build an excellent network for entry into the German and international job market.

During the first three semesters of IWT you will acquire German language skills to a B2/C1 level in courses designed for the IWT programme. Wood-specific studies during the first semester will be taught in English. As early as in the second semester you will begin selected modules in German. From the third semester on you will join the German students and attend German lectures.

Application

- Course start: 15 March (summer semester)
- Application period: 1 November – 15 January (online)
- Prerequisite: higher education entrance qualification (checked by uni-assist)
- Language requirements: English B2, German A2
